The New American FactFinder

NEW FUNCTIONALITY—BUT SOME QUIRKS

Good Things

- Have to know less to find data
- Table manipulation available online
- Can now map *any* (single) variable

Drawbacks

- Have to know less to get data
- Quirky!
- Interface not intuitive

☐	DP-2-PR	Profile of Selected Social Characteristics: 2000 (format for Puerto Rico)	2000 SF3 Sample Data	
☐	QT-P18	Marital Status by Sex, Unmarried-Partner Households, and Grandparents as Caregivers: 2000	2000 SF4 Sample Data	
☐	QT-P18	Marital Status by Sex, Unmarried-Partner Households, and Grandparents as Caregivers: 2000	2000 SF3 Sample Data	
☐	P018	SEX BY MARITAL STATUS FOR THE POPULATION 15 YEARS AND OVER [19]	2000 SF3 Sample Data	
☐	P104	IMPUTATION OF MARITAL STATUS FOR THE POPULATION 15 YEARS AND OVER [3]	2000 SF3 Sample Data	

Quirky Thing about the Results List

- Select and Download from this page if you need to pull multiple tables
  - Limit of **10 tables** at a time (I've asked for an increase in that limit but was told it's a performance issue and anyone wanting more than ten should use the FTP download)
- Click View if you want to manipulate online

May 26, 2011
The Demographic Profile Summary File has now been released for the entire country. The Demographic Profile contains information on topics such as sex, age, race, Hispanic or Latino origin, household relationship, household type, group quarters population, housing occupancy, and housing tenure. Click the more link to see information for the nation and individual states. more »

Apr 14, 2011
The National Summary File of Redistricting Data contains selected geographic areas previously released in the 2010 Census Redistricting Data (Public Law 94-171) Summary Files. In addition, this release includes summaries for the United States, regions, divisions and other geographic areas that cross state boundaries, such as American Indian areas, metropolitan statistical areas and micropolitan statistical areas. more »

Mar 18, 2011
Based on feedback we have received, we've modified some of the Topic and Geographic search options in an effort to simplify the use of these features. The changes were released on March 18, 2011. more »

Notes

- You can search for the technical documentation as well as topics in the Quick Start box on the Main page or in the "Search within Results for…" box on the Search page, but be sure you don't have other geographies or topics selected. You can also link to technical documentation from the *i* links in the Results list.

- There is a 250-geography limit on what you pull at once from AFF but a set like, "all blocks in a place" will count as one geography

Other Issues/Enhancements

- SLOW! Known issue – they're working on it
- In early 2012, plan to add the ability to do basic calculations within the table, e.g., calculate percentages

Glossary

- AFF – American FactFinder
- .csv format – comma separated format; readable by many spreadsheet and statistical analysis softwares, including Excel

Other Resources

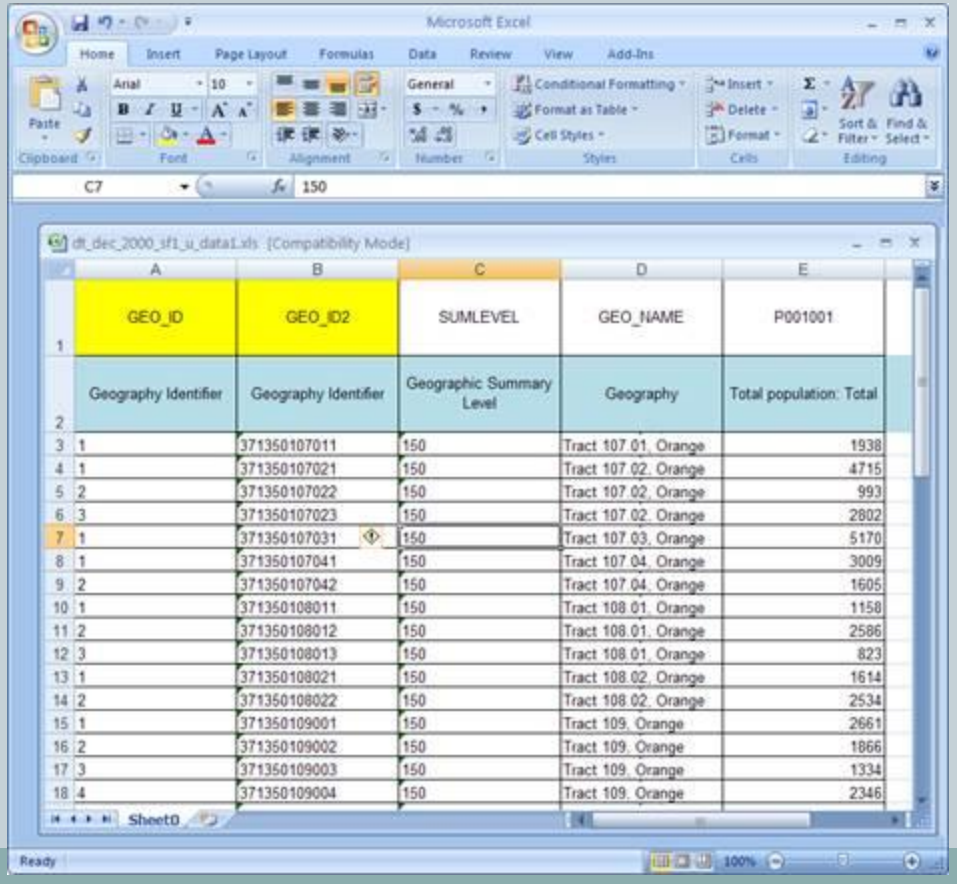
- Reference maps
  - ACS - http://www.census.gov/acs/www/data_documentation/reference_maps/
  - Decennial – http://www.census.gov/geo/www/maps/CP_MapProducts.htm#refmapdesc

For anyone who integrates Census data into GIS

- In the old AFF, the Excel file download had the concatenated FIPS and the .csv file did not. In the new AFF, the Excel file format is “presentation-ready” so GIS users should download the .csv file which in the new AFF has the concatenated FIPS codes.

GIS users (courtesy of our GIS librarian)

"legacy" format - to bring this data into ArcGIS you had to delete row 2 shown in blue but that was it.



Microsoft Excel

New AFF: you have to move the yellow cells A5, B5 and C5, up to the header row, specifically cells A1, B1, and C1, and then delete rows 2-5 shown in blue

"Then I usually recommend to people that they create a file geodatabase and import the tables so they can specify the FIPS field as text. "

Glossary for GIS

- FIPS code - a numeric identifier that many folks use to join numeric data into GIS files, and there's a separate code for each level of geography, e.g. 037 is the state of North Carolina, 001 is Alamance County.

- Concatenated FIPS - FIPS codes can repeat across the country—there's probably a 001 county in every state. So you have to have the full FIPS code to identify a given geography uniquely: 037001 for Alamance, NC instead of the separate codes for state and county. Putting the codes together like that is concatenating, where you preserve leading zeroes and insert no spaces. (And the leading zero is important!)

- GIS – Geographic Information System; thematic mapping

Exercise to Try on Your Own

- Pull a table for all counties in your state that shows veterans by sex and age.
  - Tips: "Veteran" is a word that describes people. Look for a P table. The most recent data for this will be from 2000.
- See if you can figure out how to apply a filter to find counties with similar numbers of female veterans as your county. Remember you need to transpose rows and columns to get the filter tool.
- Click the Back to Search button at the top of the page and change your geography from all counties to your city.

“Answer” – at least for my location

- Veterans is a sub-topic under People. After selecting that category, I Searched Within Results for age and sex. Table P039 has what I want. I add the geography filter for all NC counties.
- I click to View the table, click Modify Table and Transpose Rows & Columns. I see that Orange County has just over 50,000 female veterans, so I click on the filter icon for the Female column and set the Between filter at 50,000 to 51,000. Cabarrus, Orange, Randolph and Rowan have similar populations of female veterans.

“Answer” – continued

- I click on the Back to Search button. I click on the orange X next to All Counties Within North Carolina. I click on the Geography link and in the pop-up window, click on City or Town on the left to limit to that geographic level and then search for my town, Chapel Hill, in the search box. I Add it to my selections and close the pop-up window. My selection of the veterans table was wiped out so I re-selected Table P039 and click view. The data are not there. I’m thinking this is an issue with what data have been loaded to this point but I’m not sure!
